EDUCATION

B.Eng Robotics Engineering - ZUST, China. (2020 - Present)

I am gaining expertise in system development, design, and application centered around robotics. This encompasses robot system and automation engineering, control theory, mechanical and electrical systems, and computer software and hardware design.

Intl Diploma in IT & Computing - Informatics Academy, Nigeria. (2017 - 2018)

This Diploma in Information Technology has equipped me with a strong theoretical foundation and practical skills in IT management, hardware and software development. Through this program, I have gained proficiency in programming languages like JS, C, SQL, and Java, enabling me to excel in application and website development. Additionally, I have acquired expertise in configuring network and server operating systems, vital for navigating today's complex business environment.

Certificate in Foundation Skills - Informatics Academy, Nigeria. (2017 - 2017)

This 3-month program effectively prepared me for the intellectual demands and skill set required at the degree level, setting me up for success in higher education and beyond.

SKILLS

UI Design
Mobile App Development
Web Development
Data Collection and Analysis
Hardware Development

PROGRAMMING

HTML, CSS and Javascript
AWS-Amplify
React native (Expo typescript)
Basic C, Java, SQL and Python

EXPERIENCE

Remote UI Designer - Midland Digital Solutions, Lagos. (Feb 2020 - Sep 2020)

I worked with teams, using Figma, to gather user needs, designed easy-to-use interfaces, built prototypes, and incorporated feedback. I ensured our designs met user needs and business goals through effective collaboration and user-centered design skills.

Frontend Developer - Mudassir and Brothers Limited, Kano. (Aug 2019 - Nov 2019)

I played a key role in creating in-house software solutions to manage company activities. Collaborating with Sales and Marketing team, I contributed to developing and implementing frontend solutions using React native, HTML, CSS, and JavaScript. These solutions streamlined operations and improved efficiency of the company.

Frontend Developer - Steamledge Limited, Kano. (Sept 2018 - 2019)

I used Figma to design user interfaces, developed websites and apps based on UI/UX designs, and enhanced their curriculum with up-to-date technologies. I shared IT skills with other team members.

Student Intern - UBACC School, Kano. (Feb 2015 - Mar 2016)

One of my accomplishments was building an excel spreadsheet, which helped transition the school from paper-based to computer-based operations.
